A Humming Bird's Umbrella.

In front of a window where I worked last summer was a butternut tree. A humming bird built her nest on a limb that grew near the window, and we had an opportunity to watch her closely. In fact, we could look right into the nest. One day when there was a heavy shower coming up, we thought we would see if she covered her young during the rain. Well, when the first drops fell, she came and took in her bill one of two or three large leaves growing close by and laid this leaf over the nest so as completely to cover it; then she flew away. On examining the on. After the storm was over the old bird came back and unhooked the leaf, and the nest was perfectly dry .- Amer-Ican Sportsman.
